AI, Blockchain, Fake News, Privacy and Data Protection, Cyber Surveillance

I think I want to hear more about digital governance and ai governance further.

Social Implication of Digital Technology, IoT, AI(ANN, Expert System, BI), Smart City, Network Security, Information Security and Audit, Industries 4.0, Next generation technology and its governance.

Block chain, AI and digital security

AI , Big Data , Smart Cities (Case Study from India) , The privacy

AI,IoT, block chain, digital ecosystem and governance, social sciences governance, civil society experience, cyber governance

Technology used in Financial sector, Its risks and compensating controls.

1.1, 3.2, 5.2, 7.4, 7.5B, 7.6A, 7.6B, 8.4

there should be more time for cyber crime law and policy.

Fake news and upcoming recent issues.

Courses related to E-commerce could be added

IG and sustainable development Goals

Privacy and Freedom of Expression

5. Any other Comments

Hosting APSIG near central bangkok will be more desirable

Overall awesome

Role play session may be address the multi stakeholder role in digital society.

I am really appreciate the great offer for arranging the APSIG 2018 , its really organized and informative.

Big thanks to Prof. chon and Kae.

One-day hands-on tutorial sessions on AI & Blockchain technologies sound great.

I am seeing case study less useful.

Since APSIG is for leaders in the field it becomes necessary to have roundtable discussions for sharing experiences.

Also group work and presentation of their findings brings the participation to a higher level. That would work better option than just presenting case studies.

Learning from each other through discussions become important for APSIG participants because they are leaders in the field and not armatures.

Thank you
